San Francisco State University

Bachelor of Science in Computer Science

August 2019 - December 2022

Dean's List student with a **3.40 overall GPA**

Undergraduate Coursework: Data Structures & Algorithms, Discrete Math Structures, Machine Structures, Programming Methodology, Software Development, Operating System Principles, Mobile Application Development, Software Engineering.

PROJECTS AND EXPERIENCE

GatorJobs: Digital Tech Career Advisor

<https://github.com/nomarolivas/GatorJobs>

Back-End Lead in a team in order to design a web-based application that allows San Francisco State students to find their career paths in tech.

Implemented with Python, HTML, CSS, JavaScript, and SQL.

Library Management System

<https://github.com/nomarolivas/Library-Management-System>

Full functioning Library Management System where Librarians can add or delete books while also searching and issuing books to students. Books' information are stored within files using Serialization and Deserialization. Implemented with Java.

Spending Tracker App

https://github.com/nomarolivas/Spending_Tracker

iOS application that keeps track of a user's spendings by entering their spending amounts based on 4 categories. Implemented with Swift.

Tank Wars Game (Maybe another project like node.js goes here)

Multiplayer game where two players use two tanks to face each other. Includes split screen view and mini map. Implemented with Java and Java Swing.

Languages

Java, Python, JavaScript, HTML, CSS, Swift, SQL, Git

SOFTWARE

LAMP Stack, MySQL, Google Cloud Platform, Google Firebase, Flask, GitHub, IntelliJ, Xcode

SKILLS

Excellent in working and collaborating with teams on projects.

Adaptable in learning new programming languages .

Dedicated and willing to put extra time and effort outside of office or class to complete tasks.

Conversational in Spanish speaking.
